Cucumber Adam F1

- Parthenocarpic cucumber for Greenhouses
- Suitable for winter season
- Fruit length 16-18 cm with ribbed shiny green color
- 1-2 fruit per node on the main stem with long side branches
- Vigorous plant, highly productive
- Tolerant to (PM- Scab -CMV -ZYMV)

Cucumber Hussam F1

- Parthenocarpic cucumber for Greenhouses
- Suitable for summer season
- Fruit length 16–17 cm with ribbed shiny dark green color
- 2–3 fruits per node on the main stem with long side branches
- Vigorous plant, highly productive
- Tolerant to (PM – Scab – CMV - ZYMV)

Cucumber Jaber F1

- Parthenocarpic cucumber for Greenhouses
- Suitable for summer season
- Fruit length 16-18 cm with ribbed shiny dark green color
- 2-3 fruits per node on the main stem with long side branches
- Tolerant to (PM - Scab - CMV - ZYMV)

Cucumber Nour F1

- Parthenocarpic cucumber for Greenhouses
- Suitable for spring and autumn seasons
- Fruit length 16-18 cm with ribbed shiny dark green color
- 2-3 fruits per node on the main stem with side branches
- Tolerant to (PM - Scab - CMV - ZYMV)

Cucumber Zaher F1

- Parthenocarpic cucumber for Greenhouses
- Suitable for spring and autumn seasons
- Fruit length 14-15 cm with ribbed green color
- 2-3 fruits per node on the main stem with long side branches
- Tolerant to (N - F - PM)

Cucumber Joud F1

- Parthenocarpic cucumber for Greenhouses
- Suitable for winter season
- Fruit length 16-18 cm with ribbed shiny green color
- 1-2 fruits per node on the main stem with medium side branches
- Vigorous plant, highly productive
- Tolerant to (PM - Scab - CMV - ZYMV)

Cucumber Mumtaz F1

- Parthenocarpic cucumber for Greenhouses
- Suitable for spring summer and autumn seasons
- Fruit length 15-17 cm with shiny dark green color
- 2-3 fruits per node on the main stem with long side branches
- Highly productive variety
- Highly tolerant to (CMV - CVYV - ZYMV)

Cucumber Three one F1

- Parthenocarpic cucumber for Greenhouses
- Suitable for autumn and winter seasons
- Fruit length 15-16 cm with ribbed shiny green color
- 2-3 fruits per node on the main stem with medium side branches
- Long branches on 60 cm from the bottom
- Highly productive
- Tolerant to (F - PM)

Cucumber Furat F1

- Open field variety , All female cucumber
- Fruit length 16-18 cm
- Ribbed shiny green fruit color
- Long side branches
- Vigorous plant, highly productive
- Tolerant to (PM - CMV - ZYMV)

Squash Dalia F1

- Hybrid Squash variety
- Bulbous fruit shape
- Light green/green fruit color
- Fruit length 14-15 cm
- Vigorous bush type silver spots leaf
- Very good yielded for spring/late summer seasons

Squash Nadia F1

- Hybrid Squash variety
- Slightly cylindrical fruit shape
- light green/green fruit color
- Fruit length 14-15 cm
- Vigorous climbing type silver spots leaf
- Very good yielded for spring/late summer seasons

Squash Tiger F1

- Hybrid Squash variety
- Slightly cylindrical fruit shape with long dark strips
- Light green/green fruit color
- Fruit length 14-16 cm
- Vigorous climbing type silver spots leaf
- Very good yielded for spring/late summer seasons

Tomato Huda F1

- Hybrid variety for Greenhouses
- Medium early maturity, strong plant
- Fruits are firm, round with a shiny red color
- Fruit weight ranges from 180 - 200 g
- Number of chambers 3 to 4
- Tolerant to (ToMV- V- N)

Tomato Reham F1

- Hybrid variety for Greenhouses
- Suitable for long winter season and spring–summer planting
- Vigorous, tolerant plant with good foliage cover and short internodes
- Fruits have excellent shape and firmness
- 4–5 fruits per cluster
- Fruit weight 180–210 g
- Tolerant to (ToMV - F - V- TYLCV)

Tomato Paskal F1

- Hybrid variety for Greenhouses
- Strong vegetative growth, cluster type
- Coloring in the cluster is complete and uniform
- 5–7 fruits per cluster
- Fruit color red, high firmness Fruit weight 130–160 g
- Tolerant to (ToMV- TYLCV- F- V- N)

Tomato Rotana F1

- Hybrid variety for Greenhouses
- Fruits are firm, round, cluster type
- Fruit has a shiny red color
- 5–6 fruits per cluster
- Fruit weight 140 - 160 g
- Tolerant to (ToMV- V- F- TSWV- TYLCV)

Tomato Palma

- Indeterminate, Cherry type for Greenhouses
- Elongated fruit shape
- Fruit weight 7-10 g
- Red shiny fruit color, very firm
- High yield, minimum 70-85 fruits per cluster

Tomato no. 21 F1

- Hybrid variety for Greenhouses, early maturity
- Firm fruits, Plum shape , 4–8 fruits per cluster
- Fruit weight 80–120 g
- High yielding variety

Tomato no. 28 F1

- Hybrid variety for Greenhouses, medium maturity
- Firm fruits with cylindrical shape
- Fruit weight 100–110 g
- High yielding variety
- Tolerant to (N- F- V)

Tomato Razan F1

- Hybrid Open field variety
- Elongated shape with 150-180 g fruit weight
- Highly yielded variety, 4-5 fruits per cluster
- Fruit harvest with pedicel
- Very firm fruit for spring and autumn cultivation
- Tolerant to (TYLCV)

Tomato no. 4 F1

- Hybrid variety for open-field , very early and high yielding
- Strong plant with good fruit coverage
- Fruit weight 220–250 g
- Fruits are round and firm
- Tolerant to (TYLCV- F- N- V- ToMV)

Tomato no. 5 F1

- Hybrid variety for open field
- Suitable for fall, winter, and spring seasons
- Strong plant, early variety, long harvesting period, very high yield
- Fruits are firm with red color, tolerant to handling and storage
- Fruit weight 180 - 200 g
- Tolerant to (TYLCV- ToMV- F- V)

Sweet pepper no. 17 F1

- Hybrid variety suitable for Greenhouses
- Strong plant with good and uniform leaf coverage
- Fruits are thick, firm, green turning red at full maturity
- Fruit length 22 cm, fruit weight 300 g
- Tolerant to (TMV-TSWV)

Sweet pepper no. 14 F1

- Early maturing variety suitable for Greenhouses and open field
- Plant has a semi-erect growth habit, easy to manage and harvest
- Fruit color dark green, fruit weight 30 g
- Tolerant to low temperatures
- Tolerant to (TMV-ToMV-PMMoV)

Sweet pepper Al Barq F1

- Hybrid variety for Greenhouses
- Suitable for fall and winter seasons
- Strong vegetative growth, high yield, and early maturity
- No. of chambers 4
- Firm fruits with bright red color
- Fruit diameter 9 - 11 cm
- Tolerant to (TMV- TSWV)

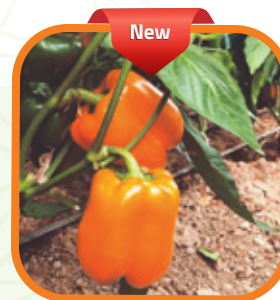

Sweet pepper Nirouz F1

- Hybrid variety for Greenhouses
- Suitable for fall and winter seasons
- Strong vegetative growth, high yield, and early maturity
- No. of chambers 4
- Firm fruits with bright yellow color
- Fruit diameter 9 - 11 cm
- Tolerant to (TMV- TSWV)

Sweet pepper no. 32 F1

- Hybrid variety for Greenhouses
- Strong plant with good early fruit set and high yield
- No. of chambers 4
- Firm fruits with orange color
- Fruit diameter 9 - 11 cm

Hot pepper no. 22 F1

- Hybrid variety suitable for Greenhouses and open-field
- Strong plant with medium maturity
- Fruits are cylindrical with pod length 15–17 cm
- Fruits are thick, firm, green turning red at full maturity
- Tolerant to (PYMV)

Hot pepper no. 23 F1

- Hybrid variety suitable for open field and Greenhouses
- Fruits are thick, firm, green turning red at full maturity
- Fruit length 22 cm
- Tolerant to (TMV)

Hot pepper no. 24 F1

- Hybrid variety for Greenhouses and open field
- Suitable for spring and summer seasons
- Strong plant with excellent tolerance to low temperatures
- Fruits are glossy green, turning red at maturity
- Fruit length 22–25 cm, diameter 3–3.5 cm
- Tolerant to (TMV)

Eggplant Super Black F1

- Suitable for Greenhouses and open-field in most planting seasons
- Early maturing and high yielding variety
- Fruits are slightly elongated, semi-oval shaped
- Fruits are firm and withstand handling and storage
- Fruits have a shiny dark black color and can be harvested at any size

Eggplant no. 12 F1

- Early maturing variety for both Greenhouses and open-field
- Suitable for winter (long season) and spring (short season) planting
- Oval shaped fruits with black color
- Strong vigorous plants with high yield potential
- Fruit length 15–18 cm , fruit diameter 12–16 cm
- Fruit weight 300–400 g

Eggplant Al Saif F1

- Suitable for Greenhouses and open-field cultivation
- Fruits are cylindrical in shape
- Fruit has light purple with stripes
- Fruit weight 250 g

Eggplant Bitar

- Vigorous plant with high yield
- Purple fruit color
- White flesh
- Suitable for pickling
- Harvested within 65-75 days from sowing

Watermelon Charley F1

- Hybrid variety Charleston Gray type
- Elongated to globe fruit shape
- Juicy flesh, Red color
- Fruit weight 12- 15 kg
- Harvested within 85 days from sowing
- Good for shipping and storage
- Mild diseases resistance

Watermelon 430 F1

- Hybrid variety
- Round to deep globe fruit shape
- Juicy flesh, Red color
- Rind is green with wide dark-green stripes
- Fruit weight 10-12 kg
- Harvest within 85 days from sowing
- Good for shipping and storage
- Mild diseases resistance

Watermelon Jad F1

- Hybrid variety Dark Crimson Sweet type
- Big oval to round in shape
- Green skin with dark green stripes
- Red flesh with a good sweet taste
- Very firm rind, suitable for storage and transportation
- Maturity within 85 days after sowing
- Tolerant to (F- AN)

Melon Shabah F1

- Hybrid Melon Ananas type
- Creamy flesh color
- Large oval fruit shape
- Yellow skin with fine netting
- Fruit weight 3-4 kg
- Vigorous plant, very good taste & flavour
- Highly tolerant to (F - PM)

Melon Luna F1

- Hybrid Melon Ananas type
- Orange flesh color
- Oblong-elongated fruit shape
- Yellow fruit cortex with good netting
- Fruit weight 3-4 kg
- Vigorous plant, very good taste and flavour
- Highly tolerant to (F - PM)

Melon Asfar F1

- Hybrid Melon yellow Canary type
- Oval fruit shape
- Light green flesh to light orange near cavity
- Brilliant yellow fruit cortex
- Fruit weight 4-5 kg
- Vigorous plant, very good taste and flavour
- Highly tolerant to (F - PM)

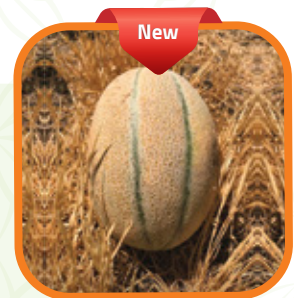

Melon Mango F1

- Hybrid Melon Charentais type
- Orange flesh color
- Oval fruit shape
- Yellow-orange skin with fine netting
- Fruit weight 3.5-5 kg
- Vigorous plant, very good taste and flavour
- Highly tolerant to (F - PM)

Melon VS 91-3 F1

- Hybrid Melon Charentais type
- Orange flesh color, oval fruit shape
- Small cavity with long shelf life
- Good netting
- Fruit weight 2.5–3 kg
- Vigorous plant with excellent taste and flavor
- Highly tolerant to (YVMV- CMV- TMV- PM- F- AN- PFR)

Broad Bean Rabee

- Early variety
- Green pods color
- Long pod 20-25 cm length
- 4-7 seeds/pod
- Vigorous plant with high yield
- Dried seeds are brown in color

Broad Bean Lima

- Early variety
- Green/dark green pods color
- Pod length 10 cm
- 3-4 seeds/pod
- Vigorous plant with high yield
- Tolerant to Root Rot and Blight

Pole Bean Lunar

- Climbing variety for Greenhouses
- Long pod with flat to round shape
- Dark green pods color
- White seeds
- Pod length 21-23 cm
- Vigorous plant with high yield
- Highly tolerant to (BCMV)

Pole Bean Yafa

- Climbing variety for Greenhouses
- Long pod with flat to round shape
- Green pods color
- White seeds
- Pod length 18-22 cm
- Vigorous plant with high yield

Pole Bean Nour Aldin

- Climbing variety for Greenhouses
- Long pod with round shape
- Dark green pods color
- White seeds
- Pod length 18-25 cm
- Vigorous plant with high yield

Pole Bean Lamar

- Med- early maturing variety for open field
- Very high production during summer and winter
- Fruits round in cross-section with dark shiny green color
- Pod length 12–14 cm, width 0.8–0.9 cm
- Harvest within 60 to 80 days after planting
- Suitable for fresh market and long-distance shipping

Corn Asal F1

- Vigorous plant, Length of plant 180-200 cm
- No. of seeds per row : 40-45 seeds
- No. of rows : 16-18 row
- Length of cob : 20-22 cm
- Maturity within 70-75 day after sowing
- Yellow fruit color

Cauliflower VS 74-1 F1

- Hybrid variety Snowball type
- Pure white, compact curd
- Fruit weight 1.5–1.75 kg
- Maturity within 75–80 days from sowing
- Highly tolerant to Black Rot and Diamondback Moth

Okra Deem F1

- Hybrid variety suitable for open-field cultivation from spring to winter
- Vigorous plant, 2–3 side branches
- Shiny green fruits with smooth skin
- Fruit length 10–12 cm, fruit weight 10–12 g
- Tolerant to (YVMV)

Okra Salma F1

- Hybrid variety suitable for open field
- Vigorous plant, 2–3 side branches
- Shiny green fruits with smooth skin
- Fruit length 10–14 cm, fruit weight 12–16 g
- Tolerant to (YVMV- ELCY)

Carrot VS 76-1 F1

- Vigorous plant with dark green foliage, tolerant to weather conditions
- Fruit has firm stem, attractive color, smooth skin
- Fruit length 16–18 cm, diameter 3–4 cm
- Suitable for shipping and storage
- Tolerant to (PM - AN)
